

Total Engagement Leadership

3 DAY STRATEGY WORKSHOP

www.brianmaddocks.com

WORKSHOP OVERVIEW

In this course, we will exercise the entire Total Engagement System using your organization's existing systems. The objective is for participants to internalize Leadership in Concept, Leadership in Context, and Leadership in Practice by working through the real-world problem of understanding the organization's strategy and how that strategy is implemented.

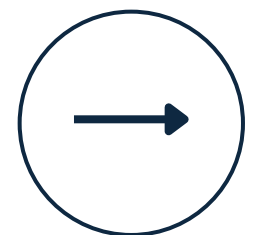

The workshop starts with an overview of the three frameworks—PILOT, VAST, and FLITE—that form the Total Engagement System. For the bulk of the workshop, we will use the FLITE Framework to analyze and document the organization's strategy through the lens of the VAST Framework. Using this “system of systems”, we will flesh out the organization's strategic architecture.

PRACTICAL APPLICATION

Students get both hands-on experience using the three frameworks and leave with an understanding of the organization's strategic implementation that they can then use to engage their teams.

This workshop does not operate on a contrived, academic problem. Like flying an Air Force jet, this workshop teaches leadership through the act of leading.

Total Engagement Leadership

THREE-DAY PROGRAM OUTLINE:

- Day 1: Prepare for Takeoff
 - Total Engagement System Overview
 - Team training in PILOT, FAST, and FLITE
 - The Common Operating Platform
- Day 2: Take FLITE
 - Focus – Plan the FLITE
 - Launch – Team FLITE Briefing
 - Implement and Track
- Day 3: Team Learning
 - Evaluate the FLITE products
 - Debrief the Process
